PROFESSIONAL SUMMARY

Finance and Artificial Intelligence & Business Analytics double major at the University of South Florida, graduating August 2026. Strong foundation in data analysis and AI-enabled applications, with hands-on experience using Python, SQL, Excel, and visualization tools through coursework and projects. Dean's List honoree seeking entry-level roles supporting AI-enabled analytics and business solutions.

EDUCATION

BACHELOR OF SCIENCE: FINANCE & AI-BA

University of South Florida, Tampa, Florida

Expected Aug 2026

GPA: 3.87 | Dean's List (4x)

SKILLS

Technical: Excel (Advanced), Tableau, Python, R, MySQL, HTML, JavaScript

Analytics: Financial Modeling, Forecasting, Data Visualization, Statistical Analysis

Business: Financial Analysis, Research, Project Coordination

RELEVANT COURSEWORK

In Progress:

Advanced Investment Analysis & Management; Applied Data Science; Big Data for AI & Analytics; Data Visualization

Completed Coursework:

Financial Modeling & Analytics; Financial Statement Analysis; Python for Business Analytics; Statistical Programming; Database Design & Administration; Risk Management; Excel & Data Model Business Analytics; Business Application Development; AI & Analytics; International Finance; Operations & Supply Chain Management

EXPERIENCE

UNIVERSAL ACADEMY OF FLORIDA, Tampa, FL, **Business Administration Intern**, (09/2024)-(06/2025)

- Supported administrative and accounting operations, including scheduling, data entry, and reconciliation.
- Managed and resolved 30-40 student and parent inquiries per week, improving response turnaround time by ~25%; served as a part-time substitute teacher as needed.

UNIVERSAL ACADEMY OF FLORIDA, Tampa, FL, **SAT Tutor**, (10/2021)-(05/2022)

- Delivered personalized SAT Math/English instruction using CollegeBoard, improving student scores by ~20%.

GEMS DUBAI AMERICAN ACADEMY, Dubai, UAE, **AI Spokesperson and TA**, (01/2020)-(03/2020)

- Volunteered to represent the AI and Robotics community; programmed and demonstrated Baxter robot by Rethink Robotics for professional audiences like business owners and industry experts.
- Supported classroom instruction, grading, & performance tracking for 25+ students using Excel based analysis.

PROJECTS

1. Loan Default Prediction (Python, Pandas, scikit-learn)

- Built classification models (Decision Trees, Neural Networks) to predict loan default risk.
- Applied k-Means clustering for borrower segmentation and risk profiling.
- Evaluated model performance using accuracy and validation metrics.

2. Demo AI Image Authenticity Detector (HTML, CSS, JavaScript)

- Created an AI powered prototype to evaluate image authenticity & detect potential AI or manipulated content.

3. Optimization of Retail Performance (Tableau, Python)

- Analyzed 291K+ retail transactions to identify sales trends, customer segments, and profitability drivers.
- Built interactive Tableau dashboards with forecasting, drill-downs, and what-if analysis to support decisions.
- Translated insights into recommendations for inventory optimization, regional focus, & revenue growth.

4. Business Performance Analysis (Microsoft Excel)

- Developed financial/pricing models to evaluate revenue, gross margin, market share, and regional profitability.
- Performed price optimization using Excel Solver to maximize daily profit under elasticity based constraints.
- Conducted break-even and productivity analysis to estimate revenue lift, unit targets, and time-to-profit.
