PROFESSIONAL SUMMARY

Magna Cum Laude graduate from the University of South Florida with a BS in Finance and BS in Artificial Intelligence & Business Analytics. Experienced in developing practical, real-world AI-driven analytical applications, data integrations, and machine learning models using Python, SQL, and JavaScript, with professional experience as a Front-End and UI Developer at Atlas Health Systems. Seeking an entry-level or internship opportunity in AI, Data Analytics, or Finance.

EDUCATION

BACHELOR OF SCIENCE: AI-BA & FINANCE

August 2026

University of South Florida, Tampa, Florida

GPA: 3.87 | Magna Cum Laude

HONORS & LEADERSHIP

- Earned **Dean's List honors** for four semesters; awarded for academic excellence and leadership in AI & Finance
- **AI Spokesperson** for GEMS Dubai American Academy AI and Robotics community; programmed and demonstrated Baxter robot by Rethink Robotics

SKILLS

Programming & Tools: Python, SQL, R, Javascript, HTML, CSS, Jupyter Notebook, Git, RStudio, NumPy, Docker

ML, Technologies, & Concepts: Pandas, scikit-learn, k-Means, Decision Trees, Data Pipelines, Neural Networks, Rest APIs, Extract/Transform/Load (ETL), Distributed Systems, Model Evaluation

Data Visualization & Analytics: Tableau, Microsoft Excel, Power BI, Qlik

RELEVANT COURSEWORK

Big Data for AI & Analytics	Applied Data Science	Data Mining & Predictive Analytics
Python for Business Analytics	AI & Analytics	Business Application Development
Statistical Programming	Data Visualization	Data Modeling for Business Analytics

TECHNICAL PROJECTS

1. AI Image Authenticity Detector - Prototype (HTML, CSS, JavaScript)

- Built a full-stack web prototype with front-end and backend functionality to detect AI-manipulated images.
- Implemented image analysis logic to detect AI-generated content and deliver real-time classification results.

2. Loan Default Risk Model - Machine Learning Model (Python, Pandas, Logistic Regression, Trees, Ensembles)

- Developed and evaluated loan default prediction models using feature engineering, EDA, and cross-validation.
- Optimized classification thresholds using cost trade-offs, delivering a model projected to reduce losses by ~\$450K.

3. Distributed Data Pipeline - ETL & Data Engineering (SQL, PostgreSQL, Cassandra, Citus, Docker, Python)

- Built scalable ETL pipelines integrating distributed PostgreSQL databases into a centralized data warehouse.
- Automated sharded data processing with Docker and evaluated Cassandra and Citus for scalable analytics.

4. Supply Chain Manufacturing - Big Data Pipeline (HDFS, PySpark, Kafka, Spark, Airflow, Docker, Python)

- Built scalable batch and real-time data pipelines using HDFS, PySpark, Kafka, Spark Streaming, and Docker.
- Orchestrated workflows with Airflow and analyzed manufacturing data for quality and operational insights.

EXPERIENCE

ATLAS HEALTH SYSTEMS, Columbus, OH, Front-End & UI Developer

June 2026-Present

- Developing the user interface for an electronic health record platform; built company's responsive marketing website.
- Collaborating on development of the core EHR platform by implementing front-end features, translating product requirements into user-friendly interfaces, and supporting ongoing system development.

THE POWER BROKER MEDIA GROUP, St. Petersburg, FL, Research & Data Visualization

May-July 2026

- Research, analysis, data visualization and data-anchored storytelling for the 20th Anniversary Edition of the Power Broker magazine, working under Dr. Han Reichgelt and Gypsy Gallardo.

INFOTECH CONSULT, LLC, Tampa, FL, Finance Intern (Part-Time; Volunteer)

Mar 2023-Mar 2026

- Helped track business expenses and keep financial records organized in Excel.
- Assisted with annual report filing and kept track of deadlines to make sure the company stayed compliant.

UNIVERSAL ACADEMY OF FLORIDA, Tampa, FL, Admin Intern (Part-Time)

Sep 2024-June 2025

- Supported administrative and accounting operations, including scheduling, data entry, and reconciliation.
