## PROFESSIONAL SUMMARY

Artificial Intelligence & Business Analytics (AI-BA) and Finance double major at the University of South Florida, graduating August 2026. Experienced in developing practical, real-world AI-driven analytical applications, data integrations, and machine learning models using Python, SQL, and JavaScript through academic projects. Dean's List honoree seeking an entry-level or intern opportunity in AI, Data Analytics, or Finance.

## EDUCATION

**BACHELOR OF SCIENCE: AI-BA & FINANCE**

University of South Florida, Tampa, Florida

**Expected: Aug 2026**

**GPA: 3.87**

## HONORS & LEADERSHIP

- Recognized for **leadership** and collaboration in AI group projects, consistently achieved top-tier performance
- **AI Spokesperson** for Dubai American Academy (DAA) AI and Robotics community; programmed and demonstrated Baxter robot by Rethink Robotics
- Earned **Dean's List** honors for four semesters

## SKILLS

**Programming & Tools:** Python, SQL, R, Javascript, HTML, CSS, Jupyter Notebook, Git, RStudio, NumPy, Docker

**ML, Technologies, & Concepts:** Pandas, scikit-learn, k-Means, Decision Trees, Data Pipelines, Neural Networks, Rest APIs, Extract/Transform/Load (ETL), Distributed Systems, Model Evaluation

**Data Visualization & Analytics:** Tableau, Microsoft Excel, Power BI, Qlik

## TECHNICAL PROJECTS

1. **AI Image Authenticity Detector - Prototype** (HTML, CSS, JavaScript)
  - Built a full-stack web prototype to detect AI-generated or manipulated images using front-end and backend logic, focusing on usability and real-time analysis of image inputs.
  - Implemented image analysis logic to detect AI-generated content and deliver real-time results.
2. **Loan Default Risk Model - Machine Learning Model** (Python, Pandas, Logistic Regression, Trees, Ensembles)
  - Developed and evaluated loan default prediction models using feature engineering, EDA, and cross-validation.
  - Optimized classification thresholds using cost trade-offs, delivering a model projected to reduce losses by ~\$450K.
3. **Distributed Data Pipeline - ETL & Data Engineering** (SQL, PostgreSQL, Cassandra, Citus, Docker, Python)
  - Built scalable ETL pipelines integrating distributed PostgreSQL databases into a centralized data warehouse.
  - Automated sharded data processing with Docker, ensuring consistency and reliable cross-shard data integration.
  - Extended architecture with Cassandra and evaluated Citus for scalable analytics and high-performance querying.
4. **Supply Chain Manufacturing - Big Data Pipeline** (HDFS, PySpark, Kafka, Spark, Airflow, Docker, Python)
  - Built scalable batch and real-time data pipelines using HDFS, PySpark, Kafka, and Spark Streaming.
  - Orchestrated automated workflows and data quality monitoring with Apache Airflow and Docker.
  - Analyzed defects, supplier performance, inventory risks, and sensor anomalies for predictive maintenance.

## EXPERIENCE

**THE POWER BROKER MEDIA GROUP**, St. Petersburg, FL, Research & Data Visualization **May-Aug 2026**

- Research, analysis, data visualization and data-anchored storytelling for the 20th Anniversary Edition of the Power Broker magazine, working under Dr. Han Reichgelt and Gypsy Gallardo.

**INFOTECH CONSULT, LLC**, Tampa, FL, Finance **Intern** (Part-Time; Volunteer)

**Mar 2023-Mar 2026**

- Helped track business expenses and keep financial records organized in Excel.
- Assisted with annual report filing and kept track of deadlines to make sure the company stayed compliant.

**UNIVERSAL ACADEMY OF FLORIDA**, Tampa, FL, Admin **Intern** (Part-Time)

**Sep 2024-June 2025**

- Supported administrative and accounting operations, including scheduling, data entry, and reconciliation.
